All Dundalk Marine Terminal Tenants – Fumigation

You will see flashing lights on the sign board at our designated fumigation buildings when fumigations are taking place. When the lights are flashing, for your safety and in accordance with safety regulations, please do not walk or drive in the marked yellow lined space close to the building. Also, as an added precaution, please avoid stopping alongside the buildings for any length of time.

Thank you for your cooperation in this matter and if you have any questions, please do not hesitate to contact our offices.
